Access Blackboard, Jaguar Connect and More!

COMING MARCH 2014

JagWire is the NEW University portal that offers convenient access to web services for students, faculty and staff. With one log-on, JagWire brings you student email, registration services, your student account and access Blackboard in one central location.

ONE LOG ON, MANY SERVICES

Students will use JagWire to register for courses, view holds, contact an advisor, access Blackboard, manage class schedules, pay online and more.

Future students can review the course catalog and apply for financial aid.

Calendars and other important announcements will be shared in the JagWire Portal including deadline reminders, emergency notifications, and state and federally mandated announcements.

CAMPUS-WIDE

Advisors, faculty and staff will use JagWire to review student transcripts and grades.

Access JagWire and web services through the new JagWire link from the University homepage, going live in March 2014.

PERSONAL ACCESS

Log on with your Windows Domain account, the same username and password used to log on to campus computers. Look for JagWire to launch in March 2014!

PASSWORD HELP?
