Exemption Requested: Spring 20_________ Summer 20_________ Fall 20_________

Reason for request:  
- Late Acceptance (Has documentation of vaccination. Must show proof prior to release of hold. Student must upload documentation within 10 days of request.)
- Taking online classes (Will be verified after 12th class day.)
- Late Acceptance (Has not received vaccination. Only allowed to register for online courses.)
- Other: __________________________________________________________

Due Date
- Late Acceptance (Has not received vaccination. Only allowed to register for online courses.)
- Other: __________________________________________________________

According to law provisions, students must have received the vaccination 10 days prior to the start of classes. TAMU-SA requires that proof of vaccination be approved by Magnus Health SMR no later than 10 days after the first day of classes. This requirement does not include:

- Students who are enrolled only in online courses or other distance education courses
- Students who are 30 years of age or older

Students who have not submitted documentation of the vaccination (or exemption) by the submission deadline will be dropped from courses as required by state law. Before being allowed to re-register, students will be required to provide proof of vaccination. Please note that the university cannot guarantee availability of courses once a student has been dropped. In addition, students who request a reinstatement may be assessed a Reinstatement Fee of $363. Timely submission of your bacterial meningitis vaccination is vital so that preparations can be made in time for the first day of school and to prevent a delay in your enrollment.

I am requesting an exemption/extension of the Meningitis Vaccination requirement based on the above circumstances. I understand that if my status changes and/or I have not submitted proper documentation to Magnus Health SMR I will be dropped from my classes and may incur a reinstatement fee.
